Buhler, KS 67522

Dear Ms. Pinto:

This letter is in reference to your demonstration of Go Treads at the Selfridge Air National Guard Base on July 23, 2013 as part of the joint ground systems Enterprise Market Investigation Process (EMIP).

Your demonstration was observed by a technical team composed of engineers, logisticians, test representatives, and other relevant government personnel. The team thought that the technology you demonstrated may offer substantial advantages over the technology currently in use and had low technical and integration risks. As a result, we intend to forward your technology idea and the EMIP team's assessment to the Marine Corps Systems Command, the Program Executive Office Land Systems, the Program Executive Office Ground Combat Systems, and the Project Manager Offices for Force Projection, Transportation Systems, Joint Light Tactical Vehicles, and Mine Resistant Ambush Protected Vehicles for potential follow-up. These organizations will determine if any additional information is required or if any further action will be taken on your technology as a result of the EMIP demonstration.

Neither this letter nor the demonstration of your technology constitutes an endorsement of your product by the Government.

If you wish to discuss your submission in more detail, please contact Mr. Robert Dziewit, 586-239-2717, robert.dziewit@us.army.mil.

Sincerely,

A handwritten signature in blue ink that reads "Fred Williams".

Fred Williams
