Capability Statement

Company:

Pinto, Inc. is a small business established and incorporated in 1991. We specialize in one product – **GoTreads®** – a professional traction tool designed to provide traction to vehicles that are stuck in sand, mud and snow. Off-road and Overland enthusiasts have used GoTreads for decades to get going again in some of the most hazardous and remote environments. Our **Professional Grade** GoTreads now provide dependable, instant traction for military and commercial vehicles.

Core Competencies:

- *GoTreads* – the original foldable plastic traction mat – is a unique patented tool designed to provide reliable traction without attaching to the tires.
- *Excellence is our priority* – each tool is hand assembled and inspected.
- *Fast fulfillment time* – currently, we can produce 25,000 tools per month. Small orders ship within 1 to 3 business days, larger orders can be fulfilled within 30 days.

Differentiators:

- Our warfighters must be equipped with a tool that can quickly get their vehicles freed from stuck situations, especially in remote areas and in combat scenarios.
- One warfighter can free his vehicle, in a life or death event, in a matter of minutes.
- The capability to get going again without calling and waiting for help is essential for effectively completing the mission.
- GoTreads offer the potential for saving lives!

Past Performance:

- *Commercial and Over-the-Road Trucking companies, Police, Ambulance and Fire Departments, School Bus Service Companies, Off-Road and Overland Enthusiasts, Utility Service Companies and the like have been using GoTreads since 1991.*
